PROFESSIONAL SUMMARY

Aspiring Software Development Engineer with strong foundations in Fullstack Web Development with Python, OOP, DBMS, and Operating Systems. Skilled in building Backend-driven applications using Python, Java, SQL, and React, with a focus on scalable and efficient systems.

EDUCATION

Malla Reddy College Of Engineering For Women

2022 – 2026

Bachelor of Technology in Computer Science and Engineering

GPA: 8.3

SKILLSET

Programming Languages: Python, Java(Basics), C, SQL, JavaScript

Frontend: React.Native (Basics), HTML5, CSS3

Backend & Databases: RESTful APIs, MySQL, DBMS

Artificial Intelligence: Artificial Intelligence, Generative AI, Machine Learning(Basics),

Tools: Git, GitHub, Docker (Basics), Azure (Basics), VS Code, Eclipse, Selenium (Basics)

Soft Skills: Problem Solving, Team Collaboration, Communication, Leadership Skills

PROJECTS

WorkTrack

Jan 2026 – March 2026

- Developed a web-based Task Management System for task creation, tracking, and team collaboration.
- Implemented features like task updates, deadlines, and progress monitoring.
- Built a user-friendly platform for efficient project and workflow management.

AI driven Archaeological Site Mapping

Nov 2025 – Jan 2026

- Built an AI-based system for archaeological site mapping using satellite images.
- Used machine learning and image processing to detect historical structures accurately.
- Helped improve heritage preservation and archaeological research efficiency.

Hospital Details And Appointment Management System

Apr 2024 – Jun 2024

- Developed an online hospital management system for easy healthcare access and appointment booking.
- Implemented features like digital payments, flexible scheduling, and online follow-ups.
- Built a user-friendly platform to reduce wait times and improve patient care experience.

EXPERIENCE

Infosys Springboard Virtual AI Intern

Nov 2025 – Jan 2026

Remote

- Developed modular AI driven Archaeological Site Mapping in Python following SDLC practices.
- Structured clean, maintainable code using Git version control.
- Integrated data preprocessing pipelines for scalable model deployment.

AICTE Internship: Microsoft-SAP AI Transformative Learning

Jan 2025 – Mar 2025

Remote

- Developed an AI-based plant disease detection system for sustainable agriculture.
- Used image processing and machine learning to identify crop diseases accurately, helped farmers improve crop health and reduce agricultural losses.
